## MATERIAL DATA SHEET

## REFRACTORY STEEL MATERIAL FOR AEROSPACE PLATENS

### FERRYNOX 51S

#### Description

The Ferrynox 51S is the result of an important internal development at **FERRY CAPTAIN**. This refractory alloy is enhanced through the use of a 15-ton capacity AOD converter, resulting in materials with low levels of residual elements and superior mechanical properties and very high creep rupture values.

#### Application

This material is mainly used in the **Aerospace** field (Super Plastic Forming or Hot Forming Platens at very high temperature). In general, components subject to frequent thermal cycle shocks and high temperature fields.
