

## Groupe CIF amid COVID-19: BACK TO FULL OPERATION

In the middle of March, following directives from the French Government, Group CIF Management took the necessary measures to protect the employees of all our seven factories. Very quickly and with tremendous efficiency we adapted to working from home and prepared all the sanitary protocols for assuring production in our factories. In just a few weeks, I was enormously proud to see production almost reaching full capacity.

*Special recognitions to FCMD GmbH team for keeping the plant running all through COVID-19 outbreak (VBCM16 in operation)*

Today, our new processes in place are fluid and efficient, combining the safety of our employees and meeting the needs of our customers.

We are proud to tell our customers that:

- all Group CIF foundries are running
- all Groupe CIF machining workshops are full in operation
- all assembly workshops are fully active
- we are continuing to find solutions in our supply chain and logistics
- all service teams in France & Europe are driving to our customer sites
- our technicians and partners outside of Europe are finding solutions and alternatives to assist our clients
- our sales & support teams are now more than ever connected to the market needs using digital solutions & platforms.

*CMD team resuming assembly operation of a Jumborex® JC62 during the first week of April*

During these difficult times, Group CIF proves once again it can adapt and service heavy industries and I would like to express my thanks to all our customers who provide trust in us.

Marthe Prunier  
President & CEO
